

Security Patch Release for all environments: April 2024

Routine scanning of our platform identified several security vulnerabilities that require immediate attention. Due to the urgent nature of these vulnerabilities, we will be applying patch updates during normal business hours.

These patches will be applied on **April 8th starting at or around 1pm EST/10am PST** and are not expected to cause any downtime in the Customer Portal.

Security Patch Release Date:

Monday, April 8th 2024 @ 1:00 PM EDT / 10:00 AM PDT

This is a security patch notice for all Matchbook environments. During this period, the system will NOT be offline.

General Updates

Routine scanning of our platform identified several potential security vulnerabilities that require immediate attention. This patch will be applied on **April 8th at 1pm EST/10am PST** and will result in minimal downtime of the Customer Portal.

As part of the patch process, there are two updates to the Customer Portal experience that will be made:

- **Dashboard** - Widget loading images (spinning wheels) are displayed now as placeholders while the dashboard sections load in the background.
- **Reject/Purge Records from File** - A message now appears asking to confirm the file upload. Once processing completes, a CSV file is generated containing result messages for data processing. This file is downloadable from the UI.

Matchbook AI, 400 Continental Blvd, 6th Floor, El Segundo, CA 90245
